The Physics of the Heliospheric Boundaries

Editors

Vladislav V. Izmodenov
Lomonosov Moscow State University
Russia

and

Reinald Kallenbach
International Space Science Institute
Switzerland
Cover: The heliospheric boundaries. Picture made by NASA/Voyager 1
Contents

Preface.........................................................................................................................vii

Chapter 1
V. B. Baranov
Kinetic and Hydrodynamic Approaches in Space Plasma......................1

Chapter 2
V. B. Baranov
Early Concepts of the Heliospheric Interface: Plasma....................27

Chapter 3
V. V. Izmodenov
Early Concepts of the Heliospheric Interface: H Atoms.....................45

Chapter 4
V. V. Izmodenov, V. B. Baranov
Modern Multi-component Models of the Heliospheric Interface..........67

Chapter 5
J. Geiss, G. Gloeckler, L.A. Fisk
Interstellar Gas Inside the Heliosphere..............................................137

Chapter 6
N. Ness
Heliospheric Magnetic Fields and Termination Shock Crossing:
Voyager 1............................................................183

Chapter 7
R. Kallenbach, A. Czechowski, M. Hilchenbach, P. Wurz
Turbulence and Ion Acceleration in the Outer
Heliosphere ..........................................................203
Chapter 8
S. V. Chalov
Interstellar Pickup Ions and Injection Problem for Anomalous Cosmic Rays: Theoretical Aspect.................................................................245

Chapter 9
E. Quémerais
The Interplanetary Lyman $\alpha$ Background..................................................283

Chapter 10
A. Czechowski, M. Hilchenbach, R. Kallenbach
Diagnostics of the Heliospheric Interface: High Energy ENAs........311

Chapter 11
B. Wood
Ly $\alpha$ Absorption toward Nearby Stars as a Diagnostic of the Heliospheric Interface.................................335

Chapter 12
R. A. Treumann, R. Pottlette
The Outer Heliospheric Radio Emission: Observations and Theory…355

Chapter 13
R. Kallenbach, V. V. Izmodenov
Summary of the Results of INTAS Project WP 01-270: Physics of the Heliosheath Plasma Flow and Structure of the Termination Shock..................................................391
List of Authors

Vladimir B. Baranov, Institute for Problems in Mechanics, Russian Academy of Sciences, and Lomonosov Moscow State University, Russia;

Sergey V. Chalov, Institute for Problems in Mechanics, Russian Academy of Sciences

Andrzej Czechowski, Center of Space Research Polish Academy of Sciences, Poland

Johannes Geiss, International Space Science Institute (ISSI), Bern, Switzerland;

George Gloeckler, Department of Atmospheric, Oceanic, and Space Sciences, University of Michigan, Ann Arbor, USA;

Len Fisk, Department of Atmospheric, Oceanic, and Space Sciences, University of Michigan, Ann Arbor, USA;

Martin Hilchenbach, Max-Planck-Institut fur Sonnensystemforschung, Katlenburg-Lindau, Germany

Vladislav V. Izmodenov, Lomonosov Moscow State University, and Space Research Institute (IKI) Russian Academy of Sciences, and Institute for Problems in Mechanics Russian Academy of Sciences Moscow, Russia

Reinald Kallenbach, International Space Science Institute (ISSI), Bern, Switzerland

Norman Ness, The Catholic University of America, USA;

Raymond Pottelette, CETP/CNRS, France;

Eric Quémerais, Service d'Aeronomie CNRS, France

Rudolf Treumann, Geophysics Section, Ludwig-Maximilians University Munich, Munich, Germany

Brian Wood, JILA and NIST University of Colorado, Boulder, Colorado, USA

Peter Wurz, Physikalisches Institut, University of Bern, Switzerland.
