Volume resulting from an ISSI Working Group, published in September 2010, ISSI Scientific Report Series (SR), Volume 9. ESA Communications Productions, Noordwijk, the Netherlands. The book (ISBN: 978-92-9221-938-3, Price: 60 €) may be ordered from ESA on <http://www.spacebooks-online.com/index.php?cPath=113>.

### Table of Contents

Foreword; *R.M. Bonnet, L. Woltjer*

#### I OBSERVING PHOTONS IN SPACE

1 Observing photons in space;

*M.C.E. Huber, A. Pauluhn, J.G. Timothy*

2 Photons - from source to detector; *K. Wilhelm, C. Fröhlich*

#### II ENERGY AND WAVELENGTH REGIONS

3 High-energy astrophysics; *G. Kanbach, V. Schönfelder, A. Zehnder*

4 X-ray astronomy; *J.L. Culhane*

5 The extra-terrestrial vacuum-ultraviolet wavelength range; *J. Gethyn Timothy, K. Wilhelm, L. Xia*

6 The visible and near-infrared domain; *S.V.W. Beckwith*

7 The mid- and far-infrared wavelength range;

*A.G.G.M. Tielens*

8 The Cosmic Microwave Background; *J.-M. Lamarre*

#### III TECHNIQUES AND SYSTEMS

9 Space telescopes; *Ph. Lemaire, B. Aschenbach, J.F. Seely*

10 Gratings and mountings; *Ph. Lemaire*

11 Imaging through Compton scattering and pair creation; *G. Kanbach*

12 X-ray imaging with collimators, masks and grids; *G.J. Hurford*

13 All-sky monitoring of high-energy transients; *K. Hurley*

14 Far-infrared imaging and spectroscopic instrumentation; *B. Swinyard, W. Wild*

15 Goniopolarimetry for radio astronomy; *B. Cecconi*

16 Astrometry; *L. Lindgren*

17 Interferometric imaging from space; *A. Quirrenbach*

18 Narrow-band imaging by use of interferometers; *M.J. Griffin, Peter A.R. Ade*

19 Imaging Michelson interferometers; *A.M. Title*

#### IV DETECTORS

20 Detector types used in space; *A. Pauluhn*

21 Hard X-ray and ray detectors; *D.M. Smith*

22 Microchannel plates; *J.G. Timothy*

23 CCD and CMOS sensors; *N. Waltham*

24 X-ray CCDs; *A. Holland*

25 Intensified solid state sensor cameras; *U. Schühle*

26 Solar-blind UV detectors; *U. Schühle, J-F. Hochedez*

27 Superconducting tunnel junctions;

*D.D.E. Martin, P. Verhoeve*

28 X-ray calorimeters; *F. Scott Porter*

29 Infrared imaging bolometers; *H.A.C. Eaton*

30 Semiconductors for low energies; *W. Raab*

31 Coherent far-infrared / submillimetre detectors; *W. Wild*

32 Solar radiometry; *C. Fröhlich*

#### V POLARIMETRY

33 Stokes polarimetry of the Zeeman and Hanle effects; *Jan O. Stenflo*

34 Polarimetry at high energies; *W. Hajdas, E. Suarez*

35 Polarization measurements of the CMB; *E. Carretti, C. Rosset*

#### VI GENERAL TECHNIQUES

36 Calibration; *M.C.E. Huber, A. Pauluhn, K. Wilhelm*

37 Cryogenics in space; *N. Rando*

38 Laser-aligned structures in space; *D.H. Lumb*

39 Earth and planet observations; *A. Pauluhn*

#### VII SPACE ENVIRONMENT

40 Implications of the space environment; *B.J. Kent*

#### VIII EPILOGUE

41 Postscript;

*M.C.E. Huber, A. Pauluhn, J.G. Timothy, A. Zehnder*

#### IX APPENDICES
