

WORKSHOP PUBLICATION

Coupling between the Earth's Atmosphere and Its Plasma Environment

(SSSI- XX)

Instructions

- The Workshop papers will be published in the refereed journal [Space Science Reviews](#) (Vol. TBD), and reprinted as hardcover book in the [Space Sciences Series of ISSI](#) (Vol. XXX), both published by [Springer](#).
- The volume editors are (TBD).
- All papers will be reviewed.
- Deadline for submission: **01 February 2011**.
- Page allocation is about 15-30 pages per paper, depending on cooperation.
- There are about 650 words per page (minus the space used for figures, tables, etc.)
- Color figures are possible provided that the color transports information, not just looks; color charges will be borne by ISSI.
- Citations must be in author-year format; paper titles are not given in the references. Using BibTex automatises this format when using Springer Style.
- Manuscripts should preferentially be submitted in LaTeX (though Word is also possible).
- Style files and templates for both formats are given [here](#) (or click “Author Tools” on SSRv page).
- Papers must be submitted directly to Springer's electronic [Editorial Manager](#) system.
 - When first using that system [you will need to register as Author of an Article](#) (fourth link from the top left corner). You will then receive a username and password by return email. Some systems may treat such mails as spam, so please check your junk mail folder in case you don't get one within a few minutes.
 - Select “[Vol XXX: Coupling](#)” as the [article type](#) of your submission.
 - The first submission may be in the form of a single PDF file with embedded figures. After acceptance, the final submission must include all materials in electronic form (i.e., text source and individual figure files)

The instructions for on-line submission can be found under

<http://www.springer.com/astronomy/extraterrestrial+physics/journal/11214>

by clicking on
«[Submit online](#)» in the right hand column
under the sub-title «**For authors and editors**».

If you encounter difficulties in submitting your manuscript, please contact Mr. Randy Cruz at Springer Dordrecht, and refer to "Vol SSSI-XXX: Coupling"* of the «Space Science Series of ISSI» in the Springer Journals Editorial Office.

The e-mail address of Mr. Randy Cruz is: randy.cruz@springer.com

He is located at the
Journals Editorial Office
Springer
P.O. Box 990
NL-3300 AZ DORDRECHT
The Netherlands

*The correct identification (volume number and alias) will be provided by Springer after the Workshop in autumn 2010. The above name is just a place holder.

A LaTeX- template particularly prepared for an Article in this WS Book is provided in the file

[template-Coupling.tex](#)

in this directory. It is self-explanatory and can be used for writing the manuscript and LaTeXing if only the Springer-Style file has been loaded.
