

	Monday	Tuesday	Wednesday	Thursday	Friday
	Welcome by Maurizio Introduction / brief summaries	GCMs update: Jaf, Licia	KH, Hybrids: Peter		Summaries / Paper plans / Extra science (some of this will slip forward...we guarantee)
	Go through action items from last time. Sort out break-out needs / working times for the week.	MI Coupling with dust: Shotaro	Magnetodiscs update: Jonny, Nick, Arianna	General break-outs Attacks on action items	
LUNCH					
	Juice / Juno - what do we need to to for support? - what will the missions want?	Ionospheres: Marina, Chihiro, Luke	MHD: Tilley, Chané, Jia, Winglee	General break-outs Attacks on action items	More science!

The schedule for our second meeting is much more relaxed than the first. Nothing above is set in stone except for the Wednesday MHD skype session for our remote US colleagues. We envision discussing the previous action plan and then addressing new research / developments. From early discussions with team members, it seems like this week might be a welcome time to dig in and get some science done. A few days work might produce quite a few publications, or at the very least many pats on the back.

There is no need to prepare a full talk. A short summary will suffice. We hope to continue the informal discussion nature of the the previous meeting.
