

**ISSI International Team „The water content of the upper martian surface“ meeting
ISSI Bern, June 19 - 23, 2006**

June 19 (Monday)

Arrival, beginning

13:30 Beginning
 Final schedule - *Möhlmann*
 Mars Odyssey results - *Boynton, Mitrofanov*

June 20 (Tuesday)

MEX results/mineralogy

9:00 - 12:30 MEX - PFS (*Formisano, Helbert*)

14:00 - 18:00 MEX - OMEGA (*Poulet, Jouglet*)

June 21 (Wednesday)

Surface - atmosphere interaction

9:00 - 12:30 "The effect of the Martian atmosphere, regolith heterogeneity, and potential mechanisms of replenishment, on the distribution and survival of near-surface H₂O" and "Geophysical techniques for investigation the geographic distribution of near-surface H₂O on Mars" - *Clifford*

14:00 - 18:00 TES/MER- MiniTES, TES (Global phyllosilicate search - *Ruff*, subsurface water ice - *Bandfield, Ruff*)

June 22 (Thursday)

Surface mineralogy

9:00 - 12:30 MER - Moessbauer - *Klingelhöfer*
 Surface mineralogy - *Bish, Jänchen*

Surface - atmosphere interaction

14:00 - 18:00 MEX-MARSIS radar - *Picardi, Plauth*
 'A survey of ice stability and sublimation till formation on Mars and a comparison to an Earth analog site' - *Helbert* (possibly also on Friday morning)

June 23 (Friday)

Summary, outlook, departure

9:00 - 12:30 Summary, outlook, ISSI-related publications (+ offer of Cambridge University Press - *S. Mitton*), continuation of cooperation
